Paperless

Yes paperless. It's the best thing. No more annoying forms to file and keep track of. Everything is in one place manageable through an intuitive dashboard built to have all the information at your fingertips. Need to review an I-9 form from a certain candidate? No problem, you can search for it in a dash.

Electronic Consent

The I-9 Portal comes with some of the most sophisticated digital signature technology available. It includes a certificate of authority to ensure validity as well as a wet signature to capture the signers' personal signature. It also includes cryptography to ensure security and peace of mind.

Notifications

In the I-9 process, notifications are extremely important to notify the candidate ahead of time to fill out the I-9 application or to remind employees of an upcoming re-verification or to fill out any incomplete information. This result is improved work flow and less time spent on the hassles of gathering the information manually.

Reporting

With the I-9 Portal getting detailed employment eligibility reports is easier than ever. In addition, forms and E-Verify reports can be viewed, printed, downloaded or emailed in seconds. You also can create reports to view incomplete forms, upcoming re-verification status, and more.

Workflow Management

From the dashboard you are able to immediately see all the details of your I-9 process. All your new hires appear in the main section with actionable items to review or complete. You know where they are with E-Verify, Section 1 or Section 2. You even have documentation right at your fingertips where you can view or download the exact report and print it if necessary.

Status Tracking

With unique status folders like Section 1, Section 2, Late or Complete, you know where everything is at every step of the way. You can see all your current employees status as well as those that are expiring or have expired. It's the best tool make sure you stay compliant and on top of the process.

Powerful Search

Once you have numerous active employees in the system, you'll need a powerful search tool to quickly bring up exact names and printable reports. Using Amazon Web Services we have an extremely fast and powerful database that allows you to search records and pull what you need in a moments notice.

Reporting

We call it one-click analytics and reporting. All the information you need to make sure you are compliant and current is right at your fingertips. You'll be able to know exactly where your complete I-9 process is with a click of a mouse.

ICE Compliant

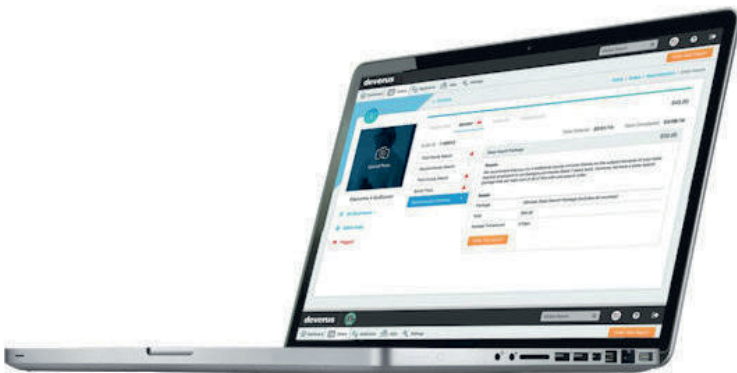

At the end of the day, it's all about whether you are compliant with Immigration and Customs Enforcement. The I-9 Portal has been reviewed thoroughly by several employment law firms and been determined that it meets the minimum guidelines set forth by ICE.

Tracking

E-Signature with secure user management tools ensures forensic-quality audit reports. You can rest assured every I-9 will be certified and defensible around who, what, where, and when. You'll have real-time access to reports that help you track Section 1, Section 2 completion as well actual e-signature timestamps.

Self Audits

Let's face it, human error does happen, especially when it's an I-9 process for a big organization. To be compliant, it's very important to make sure that all the hiring managers are adhering to the appropriate I-9 process. With the I-9 Portal, you can easily access data by user or branches and analyze certain steps to make sure there's consistent compliance.

Compliance

One of the best things about being integrated into the E-Verify system is that it's compliant because it's tied directly into the government's database on employee eligibility and verifying eligibility is the law. By using the E-Verify system, you are ensuring that you're doing your best to stay compliant.

It's Fast

When you are integrated into E-Verify from the I-9 Portal it's actually faster than using the government site directly. With just one click you get results! This ensures you are protected and get the right people on the job without worrying about eligibility and compliance.

Results

Using the I-9 Portal and E-Verify you'll get results that give you peace of mind on how you are hiring. In the Portal, you'll have a E-Verify status beside each employee searched. If there's an error or ineligible result, you'll be notified along with instructions on the proper steps to gather more information or fix the error.

Integrate with Anyone

With advanced APIs built into our Hubworks platform, you can easily deploy an integration with just about any ATS, HRMS, or onboarding system. Once plugged into the system, you'll be able to complete the I-9 process in real-time.

Improved Workflow

With an integration into the I-9 Portal, clients can continue to use the same ATS workflow but with the added bonus of being able to submit requests to employees for I-9 completion as well as manage documents, and get notifications about expirations. It's the best way to stay in compliance while continuing to use an existing ATS system.

Automation

If you're like most employers, you have tons of I-9 forms in boxes, folder, or scanned drives. The problem is unless they've been through an I-9 compliance system that checks against current employees, chances are you could be out of compliance. With the I-9 Portal once your documents have been migrated, you'll have an automated system that checks for compliance and expirations on a daily basis. This gives you assurance that all documents are current and compliant.

Transparency

Once you've completed the migration and scanned all historical documents, you'll be in great place to know your exposure and liability. No longer will you be relying on boxes of I-9 forms to prove compliance. You'll be able to pull up historical documents and provide them in no time.

Purging

After the migration has been completed, the system will create a list and documents for purging will be identified based on date of expiration. You can then work to quickly purge an expired document and immediately reduce risk.

Audit Proof

In case you do get audited, you'll have all your historical I-9s in a single system, immediately available with all the original forms and signatures. Given that more than 1,000 businesses were asked to provide historical documentation of compliance, this will give any large organization, the right peace of mind.

AWS Cloud

Amazon EC2 works in conjunction with Amazon VPC to provide security and robust networking functionality for our computing resources. Compute instances are located in a Virtual Private Cloud (VPC) with an IP range that we define. We decide which cases are exposed to the internet, and which remain private.

Data Protection

For additional isolation, we can provision EC2 resources on Dedicated Hosts or as Dedicated Instances. Both options allow us to use EC2 instances in a VPC, on hardware dedicated to a single customer.

Encryption

Using industry-standard encrypted IPsec VPN connections, we will connect existing IT infrastructure to resources in our VPC. Security Groups and networks ACLs allow us to control inbound and outbound network access to and from your server instances.
